Park & Recharge

Park & Recharge - Your Quick Guide to Easy EV Charging!

Welcome to Park & Recharge! This guide will help you get started with the Park & Recharge EV Charging App.

To use the chargers at West Berkshire please download our Park & Recharge app.

1. Finding a Charge point:

- View the Map: The app will display a map showing nearby Park & Recharge chargers.
- Browse chargers: Scroll the map or use the search bar to find specific locations.
- Save your favourite charge points: If you tap the heart icon on a charger, it will be added to your favourites list for easy access later.

2. Starting a Charge:

- Connect Your Vehicle: Plug the appropriate charging cable into your EV and the charger.
- Initiate Charging via the App: Choose the charger you'd like to use, either tap on a charger within the app or enter the charger's unique ID then select your desired socket by clicking on it and finally tap "Start Charging."

3. Stop Charging: To end your charging session:

- Tap the "Stop Charging" button in the app.
- Wait for confirmation that the session has ended.
- Unplug the charging cable from your vehicle.
- Alternatively, you can end the charging event without using the app by double pressing the unlock button on your car keys. This will unlock the cable from your car, shortly after the cable has been removed from your car, the charger will also release the cable.
